THE BEDFORD PARK FESTIVAL

Photographic Exhibition and Competition

2018

DIGITAL PREVIEW

This year we are going to offer a Digital Preview of the Exhibition for those that would like to use it.

St Michaels, Bedford Park Festival, Snappy Snaps and Chiswick Calendar have these forms of communication.

It is intended that this will allow for the promotion of the work for those that want it, as well as, ensuring friends and family in far flung parts can see what has been achieved.

Unfortunately, this facility comes with the overburden now of an explicit consent from you to partake and for your data to be used by the Church and the Festival.

Digital Data Protection – See St Michaels & All Angels GDPR statement.

This is becoming an element that must be explicitly accepted. Your photo is your data.

Neither St Michaels nor its Bedford Park Festival, of which the Photographic Competition forms part, will knowingly pass on your data to any 3rd Party.

There is a specific consent that we would like you to make on this entry form if you would like to partake in the Digital Preview. [Electronic sign up is in the info e-mail]

I,.....consent to the publication of my watermarked photographic entries to the Bedford Park Photographic Competition. I understand that those photographs will be made available, with my permission, on either Bedford Park Festival and/or St Michael's & All Angels Church website and/or the associated Twitter and Instagram Feeds that are following the Photographic Competition sites. In addition, Snappy Snaps and Chiswick Calendar have Twitter and Instagram accounts that may choose to follow and thus reproduce your photographs digitally.

I agree to the above..... Date.....

Note - Bedford Park Photographic Competition wants to ensure you are both aware and in control of your digital data as it cannot be held responsible for its misuse by any third party. We recommend strongly that your photos are watermarked and, if you chose to share with 3rd Parties, that you both retain and assert your rights as owners of the digital copyright to images and the data of which they are comprised.
